FOLIAR NUTRIENT DELIVERY / EQUIPMENT REFERENCE

NeutraBloom

Programmable delivery for your nutrient program.

A modular system for foliar nutrient delivery in indoor grows and greenhouses. Plan installation around room layout, canopy and the selected formulation.

19.8 lb	48 W	25.4 US fl oz
approximate reference unit weight	average reference consumption	reference fluid-bag capacity

PROGRAMMABLE

Emission timing set in seconds.

INSTALLATION

Plan around canopy and room airflow.

SERVICEABLE

Replaceable fluid-bag format.

Plan your installation around room volume, canopy layout and the application program. Confirm the current equipment configuration and compatible products before use.

Available finishes: White. Image shows white NeutraBloom. Product appearance and finish may vary.

SPECIFICATIONS / REV 01 / OCTOBER 2026

NeutraBloom

Technical specifications

U.S. customary measurements. Confirm your ordered equipment configuration.

01 / PHYSICAL & INSTALLATION

SKU	NF-1300-WHT
Unit weight, approx.	19.8 lb
Enclosure, L x W x H	11.81 x 5.12 x 15.35 in
Packaged weight, approx.	22.0 lb
Packaging, L x W x H	14.17 x 7.48 x 17.72 in
Available finishes	White
Mounting	Vertical or horizontal
Cold heat-up time	About 2 hours
Without mains power	About 1 hour; configuration dependent

02 / FLUID & CONTROL

Bag count / capacity	1 / 25.4 US fl oz
Maximum reference cycle	48 seconds
Timing control	Programmable in seconds

03 / ELECTRICAL

Supply	120 V or 230 V; confirm ordered variant
Average consumption	48 W
Startup heater demand	280 W
Backup battery	12 V / 2 Ah; optional, not included

NEUTRAFOG APPLICATION PLANNING

50,000 ft³ / Owner-stated maximum output. Application-specific coverage requires a facility review.

Dimensions, weights, fluid capacity and hardware limits are catalogue references converted to U.S. units. They do not establish delivered dose, crop efficacy, formulation compatibility or a treatment schedule. Verify actual packed dimensions before shipping.

The maximum equipment cycle is a reference limit, not a recommended application duration. Follow the applicable equipment manual and formulation instructions. This sheet does not replace an SOP.
